- Creativity

Experience

Project Title: Online Food Ordering System

- Developed a web application using HTML, CSS, JavaScript, and PHP.
- Implemented user authentication, product browsing, and order management features.
- Collaborated with a team of 3 to design the database and user interface.

Technical Skills

➢ Programming Languages:

- **C++:** Basic to advanced, including Object-Oriented Programming (OOP) concepts.
- **PHP:** Form Handling, GET and POST methods, Session, Cookie. Developed numerous CMS based Projects.
- **JAVA:** Basic to advanced, including Object-Oriented Programming (OOP) concepts.

.

➢ Android Development

- Developed several Android applications with XML and Java. Applications for calculators, note-taking, and student information, etc.

➢ Web Development:

- **HTML:** Expertise in structure, forms, and multimedia embedding. Built well-structured, reusable, and accessible web pages with semantic HTML.
- **CSS:** Layout (responsive positioning, sizing, floats, flex box/grid), styling (colours, fonts, borders, spacing).
- **JavaScript:** asynchronous queries (AJAX) for dynamic updates, event handling (responding to user activities), and DOM manipulation (adding, deleting, and changing items).
- **AJAX:** Seamless user interaction and real-time data fetching in web applications.
- **Bootstrap**: Utilized components like buttons, navbars, modals, and forms. Designed and styled forms with validation. Applied the grid system for responsive layouts.

➢ Database:

- **MySQL:** Expertise in design, indexing, complex queries, stored procedures, triggers, and views. Managed and optimized relational databases for web applications.
- **SQLite:** Lightweight database management, schema design, basic querying, and data manipulation. Used for managing local data storage in mobile and embedded systems.

➢ Tools:

- Sublime, Visual Studio Code, Dev C++, XAMPP, IntelliJ IDEA, Android Studio, phpMyAdmin.
